

Unitek Software Installation & Activation Guide

Step 1: Right click the down loaded zip file and select the option extract here.

Step 2: After extraction a folder will be automatically created. Click open the folder

Step 3: Install the Software

1. Inside the folder, locate the **Install.exe** file.
2. Double-click **Install.exe** to begin the installation process.
3. The License Agreement window will appear.
4. Tick the **I Agree** checkbox.
5. Click **I Agree** to continue.
6. Select the installation folder if you wish to change the default location. Otherwise, keep the default folder.
7. Click **Start** to begin the installation.
8. Wait until the installation is completed.
9. Click **Finish**.

Step 4: Launch the Software

1. After installation, a **Unitek Software** shortcut icon will appear on your desktop.
2. Double-click the desktop icon to open the software.
3. The software will display a **Product Code**.
4. Keep this Product Code ready.

Step 5: Keep Your Customer ID Ready

At the time of purchase, you would have received a **Customer ID**.

Keep both the following details ready:

- Customer ID
- Product Code

Step 6: Generate Your License Key

1. Open your web browser.
2. Visit <https://uniteklittlegenius.com/>
3. Click on **Password**.
4. Select **Offline premium K12**
5. Fill in the required details:
 - Name
 - Address
 - Phone Number
 - Email Address
 - Customer ID
 - Product Code
6. Click **Submit**.

Your **License Key** will be generated.

Step 7: Activate the Software

1. Copy or note the License Key.
2. Return to the Desktop and click(Unitek software. Product icon)
3. Enter the License Key in the activation box.
4. Click **Activate**.

Your software is now successfully activated and ready to use.

Unitek Software User Guide

How to Use the Software

Step 1: Open the Software

1. After activating your license key, double-click the **Unitek Software** icon on your desktop.
2. The software home screen will open.

Step 2: Select the Class

1. A list of available classes (Standards) will be displayed.
2. Click the required class.
 - Example: **Standard 3, Standard 5, Standard 10**, etc.

Step 3: Enter Student Details

1. Enter the student's **Name**.
2. Select the appropriate **Syllabus** (CBSE, ICSE, or State Board, depending on your product).
3. Click **Enter** or **Continue** to proceed.

Step 4: Select a Subject

On the left side of the screen, you will see the list of available subjects, such as:

- Physics
- Chemistry
- Biology
- Mathematics
- English Grammar
- (Other subjects, depending on your software package)

Click on the subject you want to study.

Step 5: Choose a Chapter

After selecting a subject, all the chapters for that subject will be displayed.

Click on any chapter to continue.

Step 6: Select a Topic

Each chapter is divided into several topics and subtopics.

Click on any topic to begin learning.

Step 7: Learn with Interactive Content

Each topic includes:

- Animated visual explanations
- Easy-to-understand notes
- Voice-supported learning (if available)
- Interactive educational content
- Diagrams and illustrations where applicable

Study each topic one by one to understand the concepts clearly.

Step 8: Practice and Test Your Knowledge

After completing a chapter, you can access:

- Multiple Choice Questions (MCQs)
- Question & Answer sections
- Chapter-wise practice exercises
- Self-assessment tests (if included)

Complete these exercises to improve your understanding and prepare for examinations.

Tips for Better Learning

- Study the topics in sequence.
- Watch the complete animated explanation before moving to the next topic.
- Read the notes carefully.
- Practice the MCQs and Question & Answer sections after every chapter.
- Revise regularly to improve your exam performance.

Enjoy Smart Learning with Unitek Software!

Unitek combines animated learning, interactive content, and chapter-wise practice to make studying easier, faster, and more effective.
